MANGROVES IN NEW CALEDONE

Eldariel - Czech elves
database

An aerial photograph of a mangrove forest in New Caledonia. The image shows a dense, dark green forest of mangrove trees. A large, irregularly shaped, light-colored area in the center is labeled 'Eldariel - Czech elves database'. This area appears to be a clearing or a different type of vegetation. To the left, a winding water channel or river flows through the forest. The overall scene is a mix of green, brown, and white, representing the forest, water, and possibly sand or cleared land.
